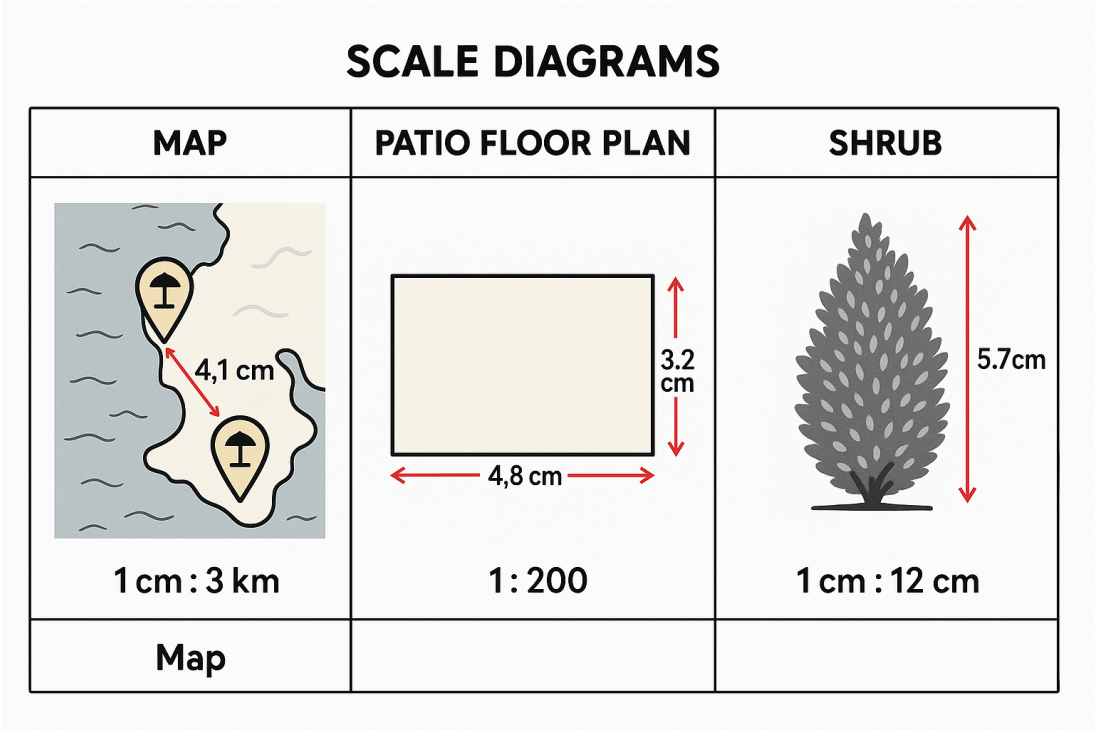
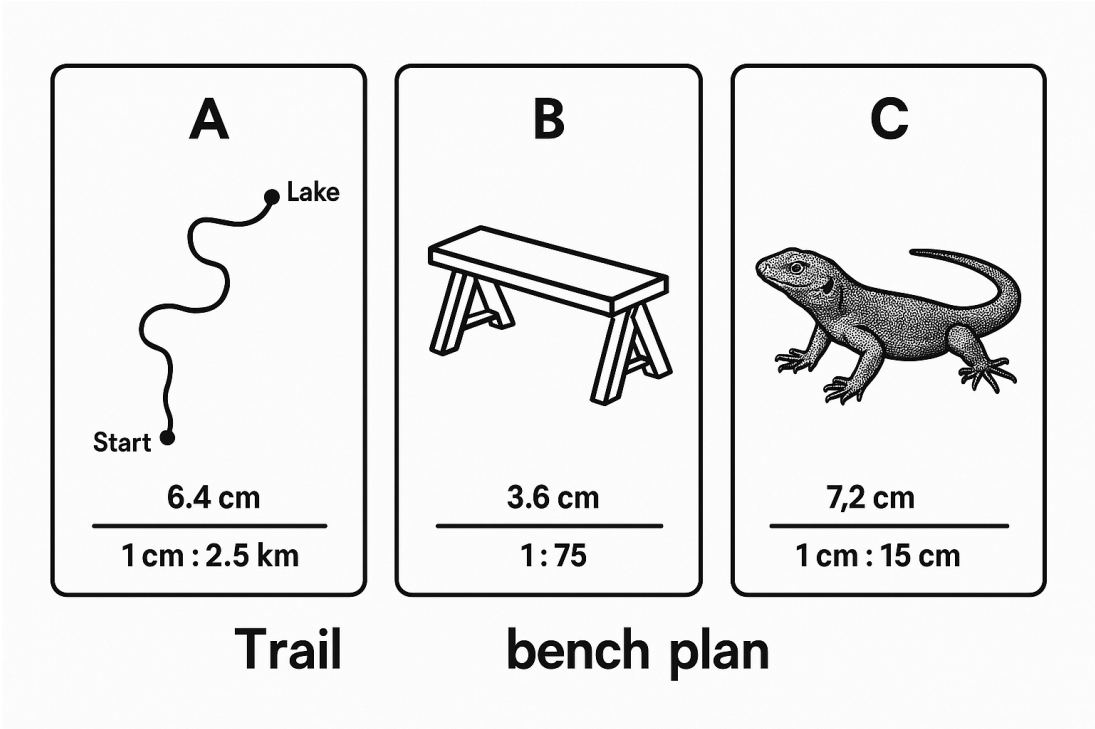
Estimating lengths from scale drawings and photos — Proficient



1. Use the map to estimate the real distance between the two marked points. Give your answer in km.

2. Use the patio plan to estimate the real dimensions in metres.

3. Use the plant measurements to estimate the real plant height in cm.



4. Use the trail map to estimate the real trail length.

5. Use the bench plan to estimate the real bench length in metres.

6. Use the lizard measurements to estimate the real lizard length.

7. A scale drawing uses $1 : 120$. A gate is drawn as 18 mm wide. Estimate the real width in metres.

8. A map scale is 1 cm : 1.5 km. Two points are 4 cm apart on the map. Estimate the real distance.
